Project #14: Mysterious Milk Streamers

- **Materials: Milk, a flat low rise see-through container, various colours of food colouring and Liquid Dish Detergent.**
- **Pour milk into see through container.**
- **Add droplets of food colouring.**
- **Watch as the food colouring swirls a bit; do not move container.**
- **Take the liquid Dish Detergent and squirt a very small amount onto the milk.**
- **Watch as the Dish Detergent moves into the milk and food colouring.**
- **It will swirl and cause the food colouring to blend like a marble effect.**
- **Due to the dish liquid weight in the milk it causes the food colouring to be pushed in various directions.**
- **Take a spoon after this and mix the solution slowly. What colour do you get?**
