

“Ann’s Creative Corner”

Project #34: Spider Webs!

- Using White Liquid Glue, squirt lines onto a plastic surface in the shape of a spider web.
- Let dry for a few hours.
- When dry, slowly peel the glue off and you will have a “Spider Web”!
- Use strips of black paper, form a spider web by using a glue stick to glue this onto some paper.
- Draw in some small spiders.
- Get some spider stickers and add to your web on the paper.
- Try using some string or wool with some white glue onto some waxed paper to make a nice effect.
- Hang your webs in the window.
- If on a piece a construction paper, cut around the web for shape and then use a hole punch and string to hang the web!

Song: Incy Weensy Spider (as in previous activity)

Talk: Safety around spiders. (as in previous activity)

Walk and Talk!
