

“Ann’s Creative Corner”

Project #37: Ants!

- Materials – cardboard egg carton, sticker eyes, pipe cleaners or twist ties, paint, non-toxic felt markers
- Cut egg carton so you have three attached egg shaped pieces.
- Using a hole puncher, punch a hole on either side of the egg shape for the leg holes.
- Attached six pipe cleaners or twist ties for the legs (insects have 6 legs).
- Add detailing as you like with a non-toxic felt marker.
- Add Sticker Eyes.
- Option to paint if you like. Suggest to paint the carton shape first and let it dry before adding any other details.

Activity: Go for a walk and see what ants you can find. They like to come out in the sun and you can find them on the pavement looking for foods and items. Watch them closely. They are very powerful and can carry large items such as if you put a raisin for example; they can actually carry it even though it is almost as big as themselves.
