

## Ann's Creative Corner

### Project #74: Fall Trees

- Cut some brown construction paper into tree trunks and branches.
- Cut some leaf shapes out of various colours of Construction Paper. Shapes can vary depending on leaf styles. They should be creative and varying styles and shapes. Even broken and torn leaves.
- On a blue or green piece of construction paper, design your tree by gluing the trunk, branches and leaves onto it to create a tree or trees.
- Add some colouring to this and draw in some details as you like. May be lines on the branches or leaves. You could also add grass, people, animals, and birds through your drawings.
- Try adding some paint details with a "thin" paint brush.
- Add some tissue paper for some 3D look.
- Add the sky, clouds, sun or other details to your creation.
- Have fun and make it yours!

### Song/Chant:

Windy Weather, Windy Weather. (movements with arms)

When the winds blows the leaves start to flutter. (fluttering leaves with hands)
