Project #104 Grizzly Bear

- Find a Grizzly Bear face mask shape on the internet or try to copy the below one.
- Glue the copy onto a piece of construction paper or poster board to make it strong.
- Add a piece of scotch tape or masking tape to each side where you will punch a hole with a hole puncher. (this will secure it from tearing)
- Thread some ribbon or elastic through the holes for securing the mask onto the child head. Be careful of elastic as you should always supervise it so the child does not get it caught on something and injured. Velcro would be best for securing any type of mask attachment as it will open easily and not get caught on anything.
- Once mask is secure, adult can cut the eye holes out.
- Next the children can colour and glue string, wool or cotton onto the mask to complete it as they like.
