

## **Ann's Creative Corner**

### **Project #109 Valentines Trees**

- Draw a tree shape or cut out various branch pieces and create a tree by gluing them onto your construction paper.
- Cut out some small heart for the "Leaves". Glue them on the branches with a glue stick.
- Draw some more details on the tree, under the tree, beside and above the tree. Maybe it is a sunny, warm day or a cold day.....
- Add your house, some people, pets etc.
- Try adding some glitter or sequins to your Valentines Tree.
- Valentines stickers could be added but first be creative with pens and crayons so the children use their own ideas.

#### **Activity:**

Go to a flower shop or garden center to view the various flower and plant arrangements that they make for this special occasion. What type of flowers have heart shapes?

#### **Read Valentines Stories.**

Talk about Love and Caring for one another.
