

## Ann's Creative Corner

(Project provided by Kid's Care Preschool)

### Project #142: Earth Day

- Cut out some round circles of Smooth type paper.
- Place into a tray.
- Prepare some small containers of food colouring mixed with some water.
- Pour some liquid "Corn Syrup" onto the smooth paper circle.
- The children can then take a "Plastic Paste Stick" or a popsicle stick and spread the corn syrup around. They may want to "Taste" it along the way.
- After they are done spreading it and maybe tasting it, take an "Eye Dropper" of various colours of the food colour/water solution to drop bits of colour onto the paper. Be careful of food colouring as it does stain!
- Children can then spread the colours around with the stick that they have!
- Talk about how the colours blend and change such as "red and yellow make orange" "Blue and yellow make green" "red and blue make purple" Etc.
- Let dry and hang up on wall. If you make various sizes of "Planets" they could also be strung as a "Mobile" by hanging them from a stick or hanger to be placed on a doorknob, ceiling, or other ideas of where to hang them...

### Song: "Zoom, Zoom, Zoom" with actions

Zoom, zoom, zoom, we're going to the moon.

Zoom, zoom, zoom, we're going to the moon.

If you want to take a trip, climb aboard my rocket ship,

Zoom, zoom, zoom, we're going to the moon.

In 5, 4, 3, 2, 1, Blast Off!

(far, far, far, we're going to the stars. Zoom, zoom, zoom we're going back to earth)
