

## Ann's Creative Corner

### Project #171: Boats

- Fold a sheet of paper in half.
- Fold corners down to form triangles on each side.
- Cut a thin strip of paper from the fold part of the boat.
- Take the remaining two pieces of the sailboat and fold the strip up from the bottom of the boat to reach the "Sails" (triangles)
- Now you will have to glue the two sides together.
- Next take a half a sheet of the same width of paper and cut it in half again.
- This paper can then be folded and glued to the boat encasing the bottom.
- Trim edges to form the boat bottom.
- Draw windows, designs etc. to your boat.
- The remaining very thin strip may also be used as a "pole" from the sails of the boat. Other pieces may be glued onto the boat for design.

### Song/chant

Two sailors went to sea, sea, sea.

To see what they could sea, sea, sea.

And all that they could see, see, see.

Was the bottom of the deep blue sea, sea, sea.
