Project #179: Caterpillars

- Place two strips of construction paper together in a right angle. Glue together.
- Fold the strip over each other alternating the strips while creasing the edges securely.
- Continue this folding until you reach the end of the paper.
- Tape each end on place.
- Add some sticky eyes, googly eyes or draw eyes on one end of your accordion caterpillar.
- Add some pipe cleaner pieces for the Antennas.
- Add Pipe Cleaner pieces for the legs.
- The pipe cleaners and feelers can be glued on with liquid glue or for younger children you may want to use paper legs and feelers that can be glued on easily with a glue stick.
- Try attaching your caterpillar to a Straw or stick with string to make it dangle like a mobile. Then you dance or walk your caterpillar.

Activity: Go for a nature walk and search for caterpillars and cocoons.

Puppet Show: Try using your mobile caterpillar in a puppet show. Walk it with the strings and straw.
