

Ann's Creative Corner

Project #188: Filter Flowers:

- Take 3 round coffee filters and spread out flat.
- Draw some colours or details onto each coffee filter.
- Lay each one in a stack.
- Fold the bunch in half.
- Poke one or two pipe cleaners through the center evenly and fold downward to be able to twist them together evenly.
- Fluff out your flower on the top.
- Add more colours to your flower as you wish.
- Add some more pipe cleaner to form leaves if you like.
- Spray your flower with a light mist of perfume.
- Use some talcum powder on the flower.
- Place in a vase.
- Make many flowers for an arrangement.

Activity: Go for a walk and see how many flowers you can find. What colours are they. How do they feel, smell and look. Talk about park flowers and gardens and to keep them safe from picking especially in a park as it is not allowed. Go to stores or a florist where you can purchase flowers or just have a look. Garden Centers are nice to view.
