Project #189: Binoculars

- Cut two fairly wide strips lengthwise from construction paper.
- Colour the way you would like the binoculars to look.
- Roll into two tube shapes and tape closed.
- Staple or tape both tubes together side by side evenly.
- Next, punch a hole into either side of the "binoculars".
- Attach a string to this if you would like to hang it from your neck.
- You may also add some coloured cellophane paper to the ends for viewing different colours.
- Bingo dabbers or stamping pads may be used to decorate these as well.
- Try some stickers!

Activities:

Go for an adventure walk and hunt for items.

Use some coloured paddles as shown in the photos to place at the end of your binoculars to change the colours.

View the colour Wheel and learn about colours.
