Project #268: Recycle!

- Using a cardboard box or plastic box, let's create our own recycle box.
- If you are using a box for paper it may be easier to create!
- Let's decorate our own recycle paper box with magazine pictures of items we may want to recycle.
- If choosing paper, decorate your box with paper recycle items.
- If you are wanting a box for plastic, use pictures of plastic recycle items.
- If you are collecting cans and bottles for returns and funds, use pictures of refundable items.
- Remember that now there are many refundable items including milk jugs, juice boxes, cans, fruit containers etc.....
- Have fun decorating whichever one you choose.
- Add some tissue paper onto your box to make it colourful.
- Children can then play with the box using their own toy items or some items you may plan to recycle for your household.

Activity:

Go for a walk and notice the many different types of recycle containers in various places. Look for various garbage containers with Recycle logos on them. If you are in a complex, check out the recycle containers within your property. Talk about the value of recycle and why we recycle to help the environment!
