Project #292: Logs and Log Boons

- Gather some fairly thick straws.
- Cover a large area of some thick paper with non toxic liquid white glue.
- Next, lay your straws onto the paper to form a log boon!
- When this is dry, add more details to the surrounding areas of the logs such as seaweed, sand, small particles of debri etc.
- Colour the area with water type strokes with a thin paint brush to create a water look.
- Add some light strokes for trees with your thin paint brush as well.
- Add some sky details
- Add a few “m” marks to resemble birds in the air.

Activity: River Walk!

Take a walk to the riverfront to gather some supplies from the beach area for your project. Note the logs on the beach, the log boons and the tug boats in the water!

Song: Row, Row, Row your Boat!
