Project #335: Feel Boards/Plates

- Cut out some cardboard, use a piece of construction paper or use a paper plate.
- A piece of wood is another idea. Or plastic trays etc.
- Glue on some bits of textured items.
- These can be wool, cotton, tissue paper, other natural sources like wood chips, unusable rice or pasta pieces (these are not recommended if edible as it would be wasting food).
- You could use a variety of bases so think of other ideas.
- Small pieces of textured items could also be made into a mobile. They may make sounds as well. Try hanging old macaroni by threading it and stringing it up.
- Try making a necklace from old pasta!
- When you are done your creation, try some sparkle glue to add some glitter to it!

Activity: Go for a walk and notice the various textures as you are walking. The sidewalk, the path, the sand, the soil, the water, the trees, the leaves etc.
