Project #336: Scented Pictures

- Using a template picture of a nose, colour it with smelly markers.
- Also, some scented spices, lavender and other scented items could be glued onto this nose.
- Try spraying some perfume onto the Nose Picture.
- Other ideas are to look in magazines and catalogues for pictures that may have the idea of auroma. Make a collage.
- Using cotton, create a picture with it by glueing it onto paper and spraying it with perfumes. The cotton will absorb the perfume
- Try using some scented powder on your creations.
- Place some spices or lavender in between two coffee filters and seal this with tape or staples. Add some colours with markers first and your child's name.
- If you make the scented coffee filter project thin enough, you can place some warm items on the top of it to see if the scent increases.....

Activity: Go to a flower store, or a spice area of the stores. Note the various scents. Go for a walk and breath in the air while thinking of the smells around you.
