

Ann's Creative Corner

Project #346: Horn of Plenty!

- Cut the shape of the horn of plenty as shown below.
- Add the details such as the circle for the "opening" to fill with fruits and vegetables.
- Draw lines as shown below to create the depth of the horn.
- Children can either draw their own fruits and vegetables, glue premade photo copied templates or you may like to make fruits and vegetable shapes with construction paper to glue onto the "opening" area of the Horn.
- Please feel free to let the children add the pictures where they like though so as not to overdirect them.
- Children can also add some colours to the horn or the pictures.
- Try using magazine photos to cut out and glue. Older children could do the cutting out if they are capable.
- You may also like to use a photo copied Horn of Plenty to cut around and then glue it onto another piece of paper such as coloured construction paper.

Activity:

Go to a fruits and vegetable market to purchase some items. Bring them home and make something from them. Fruit Salad, Vegetable Salad, Jello with fruit etc.....
