Project #394: Kites!

- Fold a piece of construction paper lengthwise.
- Snip of a triangle at the top and a triangle at the bottom away from the fold of the paper.
- Be sure one triangle is smaller than the other for the top (small) and bottom (larger)
- Add some tape to each point.
- Using a hole puncher, punch a hole at the top and bottom points.
- Add a ribbon or string to the top (Small triangle area) tie together to make a loop for the children to hold the kite.
- Next place a pipe cleaner, straw and lightweight stick lengthwise in the center of the kite. Tape it down.
- Children can decorate the kite with felt markers, stamping, stickers etc.
- Glue or tape down Streamers to the bottom.

Activity:

Go outside and run in the fields with your kite. If it is a rainy day, these small kites can also be used indoors. Or they may be used in a recreation indoor space, basement of a home, rec room etc.
