

Ann's Creative Corner

Project #398: Colours!

- Plain paper, paint, sparkles, food colouring.
- On a plain piece of paper, try dabbing some paint.
- With a small thin QTip, run the QTip through the colours and see how they change into various colours.
- Try using different objects in the paint such as a utensil from your playdough tools, kitchen plastic cutlery etc.
- When the picture is dry you may like to add something with a pencil, felt marker or crayons.
- Add some glue and sprinkle this with sparkles!
- Add some glue and place some textured items on the creation such as string, wool, tissue paper, coloured sand.....

Activity: Food colour in jars!

Try placing food colouring in jars and add some water.

With a small dropper, drop one colour into another colour and see how it changes. RED/YELLOW make ORANGE. BLUE/RED make PURPLE and BLUE/YELLOW make green.....
