Project #394: Hot Air Balloons

(by Kids Care Preschool)

- Cut three identical balloon shapes as shown.
- Cut a smaller rectangle for the box
- Cut some ribbon strips to hang the box.
- Use a basic person shape (gingerbread man shape) to put in the box.
- Fold the three Balloon shapes in half and glue each section together to form a 3D effect.
- Next add some stickers of cloud shapes to your balloons.
- Prepare the "Box" by folding the rectangle in half to form the box.
- Place your "Person in the fold of the box to be "Looking Out" Glue in place with a glue stick.
- Next attach the box to the bottom of the balloon with some strips of ribbon (staples are good for this)
- Attach another ribbon to the top to form a loop to hang the balloon (staples are also stronger for this)

Activity:

Take your paper balloons outdoors and wave them in the air. Try holding them to a lightly blowing fan. Attach them to a long string or wire to hang up and possibly blow in the wind.....
