

## **Ann's Creative Corner**

### **Project #403: Spring Flowers!**

(by South Vancouver Family Place)

- Cut out some flower shapes, stems and leaves.
- Cut out a circle for the centre of your flowers.
- Using cupcake paper is another idea for a flower.
- Small coffee filters would also be used.
- Crumple up some tissue paper of various colours.
- Glue the flowers onto a piece of construction paper in anyway the children like.
- Add the stems and the leaves.
- Add some details to the flowers with tissue paper, crayons, felt markers, bingo dabbers etc.
- Add details to the rest of the project such as the sky, trees, birds or whatever the children are capable of. Younger children may just do one flower and then that may be enough for them.... It is their creation so be flexible.

#### **Activity:**

Go to a garden centre, flower store or a walk and see the various colours, scents and shapes of flowers.
