Project #458: School Bus!

- Cut out a School Bus Shape.
- Cut out shapes for details such as doors, windows, wheels, tail pipe, lights etc.
- On a piece of construction paper, form your own design of the School Bus. Choose the colours you like and place the shapes how you like, Younger children may make a little or alot for this project. It doesn't have to be perfect and may not even look like a bus but that's okay! You may want to encourage the Wheels so it moves though ;)
- Draw in a road for your bus.
- Add some people in the windows or people getting to the door.
- Drawing is nice but stickers are okay for this part as well.
- Add Scenery or a School.
- This bus may also be added to your Schoolhouse Picture!

Song: "The Wheels on the Bus" (do actions and add various ideas)

Wheels go round and round.

Horn goes beep beep beep.

Doors go open and shut

People go up and down.

Babies go Wa Wa Wa

Adults go "I Love You"

Driver go Sh, Sh,Sh
