

## Ann's Creative Corner

### Project #455: Prints!

- Provide some liquid non-toxic paint of various colours!
- Place some paint onto some lightweight sponges or paper towels in washable plastic reusable dishes.
- Use various shapes to place into the dish of paint to make prints onto a piece of absorbent construction paper.
- Try different colours of construction paper and note how the colours may look different and change colours.
- Talk about how colours change when mixed.
- Add some powdered tempera paint to your creation.
- Add some sparkles!
- When the paint is not dry, try adding some dried leaves or flower petals to your creation!

**Activity:** Walk to collect items you may want to use for your prints. Books about shapes and nature would be nice to read and view the pictures.
