

## Ann's Creative Corner

### Project #470: Celery Stalks!

- Let's create some celery shapes from paper and put them together in a garden scene.
- Remember they have long stalks with some leafy tops.
- Have some real celery to view and taste too.
- When you are done making your celery creations from paper we can use the real celery for other edible ideas!
- Have a stalk of celery with cheese. This is a very refreshing and healthy snack.
- Create bugs on a log by adding some raisins to the top of the cheese.
- Dip your celery in a veggie dip sauce.
- Make a sauce for your celery like hummus if you like.

### Science: Coloured Celery

- Arrange a few clear cups of water with various colours of food colouring in them. Be sure to make the colouring fairly strong.
- Place your Celery Stalks including the leafy top into the coloured water.
- Let this sit for a time period and occasionally check and see if your celery has absorbed some colour. If you have enough food colouring in the water, it should change the celery right up to the leafy top!
