Project #498: Igloo Art!

- Create an igloo shape such.
- Cut out an arched doorway.
- Draw lines to create "Ice/Snow blocks"
- Provide children with small squares of white paper to glue onto the igloo shape.
- This will make the "Ice and Snow" build of the igloo.
- Next, provide tiny pieces of cotton to glue onto the igloo for more snow. (Cover igloo shape in the glue with a glue stick first and then give the children the cotton pieces)
- Please be sure they do not stick the cotton onto the glue stick as it will block and dry up the glue stick.
- Also Stretch the cotton balls and pull tiny pieces off as this is less waste for the environment. They only need small pieces.
- Place your igloo on another piece of paper if you like to create a scene. Add more details by drawing onto the Scene such as clouds, water, birds, animals etc.

Books and Songs related to igloos and Winter would be great to read. Calendars of winter igloos to view.
