Project #501: What can you do with Snow!

- Gather some snow.
- On the patio, yard or inside; think of things you may like to do with snow.
- Try melting it slowly, melt it with salt, or melt it with water.
- Add some colours to the snow such as with food colouring, powdered paint or sparkles!
- Does hot or cold water melt it faster?
- Try melting snow in the microwave....
- Outdoors, you may want to melt it with coarse salt and sand.
- Of course you can build a snow person or any other structure you could think of .
- Try making snow animals!
- Look at the branches of trees with the snow. Find some fallen branches with snow and place them outside or inside for viewing.
- Make a tree shape from construction paper with cotton balls for snow on the tree.
- Make a snow angel by laying in the snow and waving arms and legs!

Activity: Of course build a snowman, look at books, read stories about snow, many calendars have snow pictures.
