Project #507: Chinese New Year Dragons!

- Using a template of a dragon glue it onto a piece of construction paper to make it stronger and thicker. Red paper is nice for this.
- Next, cut around your dragon or dragon's head. Cutting around can be less detailed as it is the basic shape you need from your printed dragon.
- Add some sticker eyes to start.
- Colour the body and details in any way you like. Children should choose the colours and textures they like.
- Add some sparkles.
- Add some stickers if you like.
- When you are done and happy with your creation, you may like to add some popsicle sticks, tongue depressors or straws to create a puppet!
- Have fun and be creative! This is your project and be free to explore and be an individual!

Activity: Have a Parade with your dragons!
