### Project #508: Chinese Lanterns!

- Make a lantern shape as shown below.
- Add some curved lines to give your lantern some depth and shape.
- Be sure to have the top and bottom extensions so you may attach the details such as the tails and the string.
- Decorate your lantern by adding details with felt markers, crayons and pencils.
- Next you may like to add some sparkles!
- Try some stickers such as stars!
- Another idea is to use some small size bingo dabbers.
- Maybe some paint with some fine tipped brushes or Q Tips will work very well.
- These lanterns may be various sizes.
- Add your "Tails" with a glue stick.
- Put some tape at the top of your lantern and then use a hole puncher to punch one or two holes.
- Add some Pretty ribbon or string to the top.
- If you like, you may make a mobile of lanterns by attaching them to a stick or rod.

**Activity:** Browse the stores for Various types of lanterns . Take a walk through the Malls and you will see many Chinese New Year Displays.
