Project #514: A Vase of Valentine Flowers!

- Cut out various sizes and colours of Heart Shapes.
- Colour or decorate the hearts as you like.
- Glue or tape your designed hearts to straw or popsicle sticks.
- Create a "jar" by either drawing one or cutting out some construction paper.
- You may also like to create a 3D vase by using small jars or tin cans that can be decorated as well.
- Place your "Flowers" into the "Vase" you made!
- For younger children, glueing the Valentine Flowers to a piece of colourful paper would be simple and nice for the children
- This is their project and free to be what turns out so please let the children be free and creative!

Activity: Go for a walk and view the new Spring Flowers. The Crocus Flowers may be out. See if you can find some heart shaped flowers on your walk. If you can, pick some flowers from a field. These flowers can be an addition to your heart project!
