Project #540: Spring Craft Bugs and Insects!

- On a piece of construction paper make some prints from your fingers or thin paint brush.
- Let this dry.
- Add some details with a felt marker, pencil crayon or thin wax crayons.
- Make details such as eye or wings
- Stickers may also be added if you like.
- Try adding some natural fibres from outdoors such as dried grass, flower petals and small sticks....
- Think of other additions as children have their own ideas. Be flexible!
- Try adding some thin seed pods such as from the Dandelion flowers that will blow the seeds in the wind.....
- Fold paper as shown below to create an insect!

Activity:

Search for your seed pods and natural items outdoors. Add these to your "Science Table" or your art!
