Project #538: Coffee Filter Flowers!

- Flatten out a coffee filter or a cupcake holder.
- Use felt markers to colour this.
- Use some Bingo Dabbers.
- Try some lightly squeezed colours from eye droppers.
- QTips also are artful for this.
- Let your creation dry.
- Attach this to a pipe cleaner and pinch the flower shape onto the pipe cleaner by taping it. You may need to put a hole into the centre of the "Flower" and push the pipe cleaner through before taping.
- Also you may like to create the centre of the flower by using part of the pipe cleaner to design the inside of the flower base.
- Flowers can be made using multiple layers of coffee filter or cup cake holders.
- For younger children the cupcake holders may be easier.
- The larger coffee filters may be more fun if you have children who like to use more decorative paint and bingo dabbers!
- Add sparkles too!

Song: "I'm a Little Flower" (Tea pot Tune)

I'm a little Flower, Pretty and Bright!

Sitting in the soil under the Sunlight!

Once a little seedling, oh so Small!

Now I'm a flower, nice and Tall!

(Think of various actions you may like to use such as growing tall etc.)
