

## Ann's Creative Corner

### Project #682: Easter Bunnies!

- Create a Bunny Shape out of construction paper. Most bunnies are brown, black or white but be creative and make various colours if you like.
- Supply Stretched cotton puffs (this extends it for less waste)
- Glue stick is best for this as it has a nice thin layer for cotton to stick on the paper.
- Add details to the face such as eyes, nose and a mouth.
- Add details to the inner ear and feet may have lines for toes.
- Add a carrot shape to the bunny as he may be eating it!
- Try to add bits of colour here and there to add some details.
- One full cotton ball could be the tail.
- Paint your bunny!
- If you like, place your bunny or bunnies onto another piece of paper or postboard to create a scene for you bunnies. This could be a nice group project for family and friends!

**Activity:** Visit a pet store or farm with bunnies! Feel how soft they are. Feed them lettuce and carrots if allowed. Watch them hop and socialize with each other.

Read bunny stories.

Sing Bunny songs like "Here comes Peter CottonTail"
