

## **Ann's Creative Corner**

### **Project #690: Spring Seeds and Nature!**

- Gather some springtime nature pictures from magazines, calendars and flyers.
- Provide some nature samples such as dried flower petals and seeds.
- Place your nature samples onto some Sticky paper such as self adhesive shelving paper.
- Sprinkle some of the dried seeds onto this creation. Dandelion seeds work well for this project!
- Cover this with some see through waxed paper or see through cellophane paper. Try various colours of cellophane paper and note how the nature samples may change colours.
- For the magazine type pictures, you may like to create a collage by gluing them onto a piece of construction paper.
- Add some other details by drawing things such as homes, animals and the weather, sun, clouds etc.
- The collage may also look good with some nature items such as the dandelion seeds.

**Activity:** Nature walk and gathering natural items. The dandelions will be available to pick. Let them dry out. Blow the seeds off them for the projects or just blow the seeds off into the wind.
