Project #704: 3D Constuction Box Art!

- Gather some boxes of various sizes such as large, medium and small cardboard boxes.
- Gather other boxes such as various cereal boxes, card boxes and other file type boxes.
- Start your construction project by organizing your boxes in sizes and shapes.
- Use some strong packaging tape to adhere them together in the shape of the house, car, truck, motor cycle, bicycle etc.
- Using a wagon as a base is a good start as shown in the photo below!
- Add some colourful paper or tape to your construction project. Reflective tape is great for this as it id outstanding!
- See if you can design some "window shapes" onto your project.
- Add some paper towel roll tubes covered in tinfoil for some decorative "Pipes"
- Add some yellow shiny paper for the "Headlights" if you are making a car.
- Ideas are endless and may take many hours or days to add as you feel.

Activity: Have a Construction Project Parade!

View various construction sites and note how the safety measures are in place. Maybe a worker will allow you to talk and may give the children some safety tips such as Hard Hats are needed!
