Project #713: Sunglasses!

- Cut out a sunshine shape.
- Cut out sunglasses shapes.
- Glue the glasses onto the sunshine.
- Add details as you like such as decorations around the sunglasses could be trims like flowers or other shapes.
- These shapes could be drawn, stickers or other ideas you may have. Try some 3D shapes by using scrunch tissue paper.
- Another idea is to make your own sunglasses with various colours of cellophane see through paper.
- Various sunglass shapes may be found in a store such as the Dollar Store.
- Tape or glue the cellophane colours through paper onto the back of the premade glasses shapes.
- Try various colours too.
- Sparkle glue may be a good addition to this project too.

Activity: Testing the coloured “Sunglasses”

Go for a walk outdoors to see how your new sunglasses work. Notice the difference in the colours or shade details that you made. Compare these to real sunglasses. See if you can find some sunflowers or other flowers in the shape of the sun!
