Project #735: Water Sports and Boats!

- Gather various photos or magazine pictures of various water sports.
- Cut around these and make a collage by gluing these onto a piece of construction paper.
- The land and the sky could be added as well or the lake or ocean etc.
- If you would like to make individual water sport ideas, think about making a set of Water Skis for example out of your paper scraps.
- Make a 3D project using playdough as a base and then using toothpicks and tape maybe to attach your creations.
- Some recycle containers are great for this project.
- When you are done, the playdough will dry and also could be removed from the plastic container.
- The container may be washed and used again or put in the recycle bin.

Activity: Make your own Playdough!

- 2 cups flour
- 1 cup salt
- 2 tbsp cream of tartar
- 2 cups Boiling water
- 2 tbsp vegetable oil
- Food colouring

Cook on the stove in a non-stick pot on medium heat stirring constantly until it forms into a ball. Remove and let cool a little. Knead until smooth to combine it thoroughly.
