Project #744: Community Box Art Construction!

- Gather various sizes of boxes such as cardboard boxes that may be recycled.
- The boxes may be large packaging boxes and also other boxes such as shoe boxes, cereal boxes, pasta boxes etc.
- You may also like to use the recyclable plastic take out containers and drink containers as well. Wash all of these well with soap and water so they do not attract insects!
- Start placing your boxes in any way you like to create your own construction piece.
- This could be a car, house, tunnel, roadway etc.
- When you are ready, use strong packaging tape to tape the boxes in your design.
- You may also like to add pretend windows and doors or other details by using felt markers on this creation.
- Try using some coloured tape such as masking tape to create doors and windows.
- The cylinder shaped recycle cups may be used for tailpipes and rooftop items such as the police sign, taxi or fire truck for example.
- Ideas are fire trucks, cars, trucks, ambulances, police cars, taxis, tractors, trailers, semi trucks are some.

Activity: Go on a Vehicle Walk to look for various types of vehicles. Construction sites are great to view and learn from! The Supervisor may be available to speak with your group briefly and the site restrictions and safety.
