Project #786: Winter Sports Ice Skates!

- Cut out the shape of an ice skate from poster board paper.
- These may also be cut for boxes such as packaging boxes, shoe boxes, cereal boxes etc. This is a good way to use these items that are recycled.
- Punch holes with a hole punch to thread a "lace" through. This can be string, wool or thin shoelaces.
- Children may string the laces through the holes to form a "tie" for the "laces".
- If you make two skates, they may be tied together to make a pair of skates.
- Children may also draw on their skates, add stickers, add textured materials etc.

Song with Movement: "Skaters Skating Away" (with actions)

There were 2 skaters skating away, skating away, skating away
There were 2 Skaters skating away so early in the morning
The ice was thin and they both fell in, both fell in, both fell in
The ice was thin and they both fell in, so early in the morning.
Jamie and Carla pulled them out, pulled them out, pulled them out
Jamie and Carla pulled them out, so early in the morning!
(Repeat for as many children you have)
