

## Ann's Creative Corner

### Project #787: Snowflakes!

- Use a Coffee filter.
- Fold the coffee filter to various sizes being sure that it is thin enough for snipping with scissors.
- Snip small pieces out of the filter.
- A hole punch may also be used.
- Open your filter wide to see the type of snow flake you created.
- This may also be done with plain white paper cut into a circle, triangle, or any shape you like.
- Fold the paper, snip and open!
- Paper or filter may also be decorated first such as with sparkles or thin stickers!
- Snowflakes may also be painted with sparkles after they are cut out and opened.

#### Chant: “Snow is Falling Down” (actions with fingers)

Snow is falling down. Poof!

Snow is falling down Poof!

Twirling, Swirling, Twirling Swirling!

Snow if falling down. Poof!

(Actions with dancing as well would be nice for young children)
