

## **Ann's Creative Corner**

### **Project #784: Penguins!**

- Provide the shapes of the penguin.
- Provide a sample of how to place the pieces to create the penguin or penguins.
- You will need the basic body shape, facial features, wing shapes and triangles for feet.
- Penguins are black and white with orange or brown feet.
- The pieces should be glued together.
- Add some stretched cotton for the texture of the fur of your penguins.
- Place one or two penguins on a poster board or construction paper
- Add a pond and ice for the scenery.
- Add some trees.
- Add some natural materials you may find on a walk such as pine or evergreen tree branches and possibly some pine cone pieces as well as some evergreen leaves.

**Activity:** Go to the Aquarium to see if they have penguins to view. Read books on penguins. Make an additional collage from magazine or calendar photos. Gather outdoor natural materials that may be part of your creation, especially if doing a penguin scene.
