Project #813: Flowers from Coffee Filters!

- Use felt markers to colour a coffee filter in any way you like.
- Use various colours.
- Spray lightly with water.
- While still damp, fold the filter in half and in quarters.
- Open it up and look at your blended colour design.
- If you prefer, fold it only once, twice, three times or more to see the effects!
- Let dry.
- Fold again and snip pieces out of the edges, such as triangle, loops, slits etc.
- Lay one, two or more together, poke a hole in the center.
- Slide a pipe cleaner into the center and tape in place.
- The remainder of pipe cleaner may be bent to form leaf shapes.
- Fluff up your flower shape to give it texture.
- Spray in with Perfume or Sprinkle Scented powder on these.

Activity: Flower Game Search

Place flowers in various places in your space. Each child can be asked to find a certain shape or colour of the flower. When all flowers are found, count them, name them, name the colour etc.
