Project #819: Flower Art!

- Cut various sizes of flower petal shapes
- Cut some stem shapes.
- Cut leaf shapes.
- Cut various sizes of circles for the center point. These are often yellow or orange but can be other colours as well.
- Arrange on a piece of paper such as construction paper. This would be nice on a light beige or light blue piece of paper
- Glue your flower pieces together in anyway you like to form your type of flower/s.
- When you are done gluing flowers onto your paper, add some details such as the area around the flowers or garden.
- These could be grass, fences, sky, house etc.
- Stickers may be nice to add people and animals.
- Add some texture to this by using various textured papers as well.
- Use some natural items you may find outdoors.

Activities:

Nature walks to view nature. See what items you may find on the ground. There may be flower petals, seeds, dandelions to blow the seeds off!
