Project #841: Rainbow and Clouds!

(By Kids Care Preschool)

- Provide a rainbow shape with many arches to provide the rainbow colours.
- Use some small stamps or bingo dabbers to create the various colours of the rainbow.
- Add some sparkles if you wish.
- Glue some cotton balls onto the bottom of your rainbow to form the clouds.
- You may also like to use white tissue paper, construction paper or other types of white paper for your cloud shapes.
- Cutting various sizes and shapes of clouds from scraps of white paper works well too.
- If you would like to add the sun and the rain, your rainbow and clouds may be glued onto another piece of construction paper or a poster board.

Activity: Making a real rainbow!

Try using a garden hose when the sun is shining. You may see a rainbow in the spray of water. A Sprinkler works very well for this. Have fun running through the sprinkler on a warm, sunny day!
